ABOUT US

Operating from the illustrious cities of Abu Dhabi and Dubai, GBHIC was formed with the collaborated aim of being able to offer complete solutions with a more efficient approach to the traditional method of managing a construction project, by providing coordinated services all within one company and under the same roof.

We offer a variety of services involving Civil Construction, MEP Contracting, Infrastructure services, and Industrial installations across various segments of the industry. We further specialize in:

- Infrastructure and Civil Works construction
- Design & Build Contracting
- Turnkey Contracting
- Value Engineering
- Industrial equipment procurement and installation
- MEP works

Following our successful tenure in the United Arab Emirates, GBHIC have initiated its operations in the Sultanate of Oman. Our long-term focus would be to establish our expertise in other GCC regions.

MISSION AND VISION

GBHIC

GBHIC values longstanding relationships in connection with clients, business partners with our suppliers across the globe. Trust, integrity and teamwork are the foundations of our culture. We work along with our clients to help in solving their complex problems and challenges.

Our perseverance, attitude and disciplined focus are what drives us into the delivery of excellence. At GBHIC we respect our clients, the environment, our community and each other. Safety and care are highly regarded in our work practices and is the key to the positive solutions we deliver to our clients.

CORE VALUES

GBHC

The work we do has a significant influence on our surrounding communities. As corporate citizens, we aim to make positive and lasting change by building strong, prosperous and sustainable communities.

Our value of care means we're committed to making a difference. We support causes that matter to our people and that align with our values. We make the most of our skills and available resources to benefit the communities we live and work in.

CSR POLICY

GBHIC

The GBHIC emphasises CSR programs in keeping with its Emirati roots and philosophy which stress that a responsible business house should fulfill its corporate social responsibilities.

At the heart of these CSR initiatives is the Group's desire to contribute to the development of society as a whole. The Group's projects have contributed to job creation, ethical business practices and supporting the economy through affordable utility pricing to industry. Other initiatives include hiring local employees, offering growth opportunities to deserving talent and value added services to the underprivileged.

The Group is also involved in charitable initiatives, because of the founder's deep-rooted belief that sharing wealth with the community is one way of growing.

OUTLOOK TO THE FUTURE

GBHIC

GBHIC is deeply committed to the community, the environment and our customers. We care particularly about sustainability, efficiency, safety and long-term success in all aspects of our business. Our core values of Care, Integrity, Perseverance and Agility set us apart from the competition.

Our policies and safety standards protect our people and our clients. We aspire to always strive to do what is in the best interest of all stakeholders involved. Our track record speaks for itself and of our central values of Care, Integrity, Perseverance, and Agility.

Diligence is what we believe...

CIVIL & INFRA PROJECTS

Construction Engineering and Management covers advanced project management approaches to finance, plan, design, construct, monitor and control construction projects. This department emphasizes in-depth approaches such as project organization management, construction planning and control, project procurement, contract management, productivity analysis and improvement, quality and safety improvement, sustainable construction, project financing, infrastructure management, international construction joint ventures and construction business strategy.

GBHIC's Infrastructure Management focuses on the processes necessary for the planning and development of new infrastructure, and on maintaining and operating mature infrastructure for sustainability. A wide array of infrastructural services like optimal maintenance management, reliability of infrastructure systems, asset valuation and utilization, and infrastructure planning under risk and uncertainty are undertaken.

GBHIC provides the latest building cost information on a vast range of building materials, labour and equipment hire through our Estimation & Tendering department. GBH International Contracting undertakes Infrastructure Projects operating in the industrial, residential, commercial, public and mining sectors of the building and construction industry. We are proficient in our Construction assignments, which includes tenders, fit-outs and specialized contracts & we offer:

- Feasibility Studies
- Civil Infrastructure / Civil construction and bringing constructability solutions
- Project Organization Management
- Construction Planning & Control
- Project Procurement
- Contract Management
- Productivity & Analysis
- Quality & Safety Improvement
- International Construction Joint Ventures
- Construction Business Strategy

DESIGN & BUILD CONTRACTING

GBHIC

Our design and build teams work together handling estimation, assessments, engineering and construction in an open communication approach and purposeful collaboration to deliver otherwise unachievable results. We build value engineering into a design and carry out a strategic planning approach that results in costs minimized, schedules streamlined and efficiencies realized.

TURNKEY CONTRACTING

GBHIC

GBHIC is established on quality of service. In addition, we offer dependability so you can rely on the job getting done and in a fashion, that suits your needs. GBHIC can coordinate the action needed for any job whether it be a home, single buildings to large-scale developments, commercial, or general construction, GBHIC is your best choice for optimum contracting delivery results.

VALUE ENGINEERING

GBHIC

GBHIC's philosophy is based on its highly effective management team that works side by side with organized effort, considering accurate planning and resource deployment, two essential keys to achieve value engineering results throughout the execution & delivery process. "We look closely at design solutions, cost worth consideration, consistent performance, premier quality, reliability and safety from design through project completion."

INDUSTRIAL EQUIPMENT, PROCUREMENT AND INSTALLATION

GBHIC

GBHIC's capability can handle a complete production line. A company that you can depend on owning a full fleet of service vehicles and cutting-edge tools and technology, a service department that consists of highly trained professionals that are ethical and certified in both procurement and installation. Each member of our senior management team has the experience to supervise and coordinate turn-key installations and production equipment to obtain peak production levels. Our HSE department focuses on determining what the needs of the clients are and meets their solutions. We assist with advising on procurement methods, contracting, evaluation of proposals and manage and administer the right choice of suppliers.

MEP CONTRACTING

Our MEP Division is able to carry out all types of MEP installation works. We have executed several projects of various magnitudes which includes services in the following fields:

- Commercial Towers
- Luxury Villa Projects
- Residential/ Commercial/ Infrastructure
- Hotels
- Housing Compounds
- Malls
- Community Centers

HSE POLICY

GBHIC

GBH International Contracting LLC is committed to prevent all types of incidents, ensuring the Health & safety of people and minimizing adverse environment impact at all our workplaces which include all types of Industrial, Commercial, Residential and Infrastructure construction works through effective Occupational Health and Environment Management systems.

OUR BELIEF

- Any incidents which cause ill health, damage to environment and damage to properties can be prevented by taking necessary health, safety & environment precautions.
- Implementation of Health, Safety and Environment requirements are a line responsibility and HSE professionals will work as catalysts to ensure that all site personnel fulfill their HSE voluntarily.

OUR GOAL

- Provide safest possible working environment to employees and subcontractors.
- Discourage actions & behaviours, which harm health, safety & environment.
- Encourage HSE awareness among employees and subcontractors by suitable motivation.
- Establish and maintain respectable HSE Practice in all aspects of the work and all level of organization.

OUR PATH

- The senior management shall visibly uphold the principles of this policy
- Comply with legal, local regulations and contractual obligations & requirements.
- HSE Policy shall be established, documented and maintained in line with the ISO 14001 : 2015 & OHSAS 18001 : 2007 requirements.
- Organization shall set periodic objectives to ensure continual improvement through risk reduction/elimination.
- Health, safety and environment responsibility shall be specifically communicated to all concerned and clarified to ensure proper understanding
- Every activity shall have formal risk assessment and all employees and subcontractors shall be made aware of the hazards and control measures of the job being performed.
- Environment aspects related to the organization shall be identified and significant impacts shall be determined. Pollution prevention and waste reduction re-use and recycling are to be encouraged.
- Consumption of natural resources & energy shall be reduced, reused and recycled.
- Employing contractors who aspire to adopt the same HSE standards in their works.
- Health, Safety and Environment performance shall be periodically monitored.
- The appropriateness of this policy shall be ensured by reviewing it periodically.

HSE - MANAGEMENT PROGRAMMES

In order to achieve its HSE- Objectives, Management Programs are identified; upon Significant Aspects and concerns are initiated identifying designations, responsibility and authority for achievement of the objective and a clear description of the means and time frame by which the objectives are achieved. Status of Action Plan is updated periodically by Management Representative and review during Management Review. In case of any changes to the activity, product, services or operating conditions the same is updated and communicated accordingly by Management Representative.

HSE- MANAGEMENT PROCEDURE

The Environmental Impact & Occupational Health & Safety Risk Management procedure provides a detailed methodology for identifying the environmental aspects of the GBHIC business and develops control measures to its significant impacts that have or can have on environment in full compliance with the Legal and Other Requirements (LOR), to carry out an Occupational Health and Safety (OH&S) Hazard Identification, Risk Assessment and determine the Risk Control measures in full compliance with the Legal and Other Requirements (LOR).

For the management of change, GBHIC has identified the environmental aspects of its activities, products and services within the defined scope of the environmental management system that it can control and those that it can influence taking into account planned or new developments, or new or modified activities, products and services, and the OH&S hazards and OH&S risks associated with changes in GBHIC, the HSE management system, or its activities, prior to the introduction of such changes.

GBHIC ensures that the results of these assessments are considered when determining controls. When determining controls, or considering changes to existing controls, consideration shall be given to reducing the risks according to the following hierarchy:

- Elimination
- Substitution
- Engineering controls
- Signage/warnings and/or administrative controls
- Personal protective equipment

GBHIC documents and keeps the results and information of aspects that have or can have significant impact(s) on the environment (i.e. significant environmental aspects) and identification of hazards, risk assessments and determined controls up-to-date.

GBHIC shall ensure that the OH&S risks and Environmental Aspects and determined controls are taken into account when establishing, implementing and maintaining its HSE management system. The aspect impact analysis has been conducted based on the established procedure "Aspect Impact analysis"

PROJECT MANAGEMENT

GBHIC

GBHIC follows a prototypical Project Management practice that is in line with the international Project Management standards and processes. Our Project Managers possess years of valuable experience and are well exposed to the intricacies of successful Project delivery. We stress on accurate documentation and effective communication between all stakeholders.

PROJECT ADMINISTRATION

Contractors Project Representative

The Project Manager shall be responsible for all project related issues expecting contract administration.

Project Communication

All communication regarding technical and site related works between the Client and GBHIC shall be between the nominated Site Manager and GBHIC Project Manager. However all contractual and financial issues will be dealt by the GBHIC representative.

PROJECT ADMINISTRATION

Project Master File System

All Project administration, procurement, technical, construction, testing and inspection documentation files shall be maintained at the work site office with additional copies as required to be maintained at the city office.

Project Document Reference System

All project administration, procurement, technical, construction, testing, and inspection documentation shall be maintained at work site office strictly in accordance with the document identification instructions included in the respective appendices and additional copies as required to be maintained in the city office.

Compliance with Local Laws and Regulations

The Project Manager shall ensure that all work is carried out in strict accordance to the laws and regulations and that any approval, licenses or certificates required from any government agency are obtained in advance of the time the work is to be carried out to ensure that no delay in completion of the work occurs.

Project Planning

All work to be carried out shall be planned to accommodate all factors which could influence timely completion of the work, including but not limited to environmental conditions, availability of man power, material and equipment and public and religious holidays.

Project Scheduling

All activities required to be carried out shall be scheduled to satisfy the client project specifications.

Project Control

Manpower: All personnel assigned to the project shall record all hours worked on the time card and submit them to the approval of their supervisors.

Equipment: All equipment required to carry out the work comprising the overall project scope of work shall be provided in good working condition and shall be maintained strictly in accordance with the supplier / manufacturer's instructions.

Cost: All material, equipment, services etc. are required to carry out the work comprising the overall.

Progress: All activities including technical performances, required to carry out the works shall be measured and evaluated in accordance with the project specifications to assess percent completed relative to planned project progress to ensure that the project time schedule is maintained.

Project Quality Control

All project functional activities will be audited periodically by a member of the Project Control Manager.

Project Safety Practices

GBHIC recognizes the importance of safe working practices and maintain strict safety procedures, which are rigorously enforced at all levels of project management and supervision, to ensure the well-being of the project work force and to ensure that no accident occurs which could cause delay to timely completion of the project.

Contract Review

Contract review is to investigate if all demands in the Contract can be met and if demands are stated correctly and unambiguously. The Operations Manager and Project Manager are responsible for the evaluation of the Contract requirements. It is important that if contract details can be misunderstood the client should be contacted as soon as possible to clear any area of doubt. Any such amendments must be formally recorded with all parties countersigning the agreement. Evaluation of the contract needs to be completed before a quotation is formally issued. This is to prevent that in the contractual phase with the client nonconformity will occur between the quotation stage on one hand and the demands in the contract on the other.

DOCUMENTATION INSTRUCTIONS

Project Master File

All project administration, procurement, technical construction, testing and inspection documentation files shall be maintained at the work site offices in accordance with the Project Master file Number System with additional copies as required to be maintained at the Head Quarters.

Project document distribution Schedule

A project Document Distribution Schedule shall be prepared to clearly indicate to the project participants to whom respective project document shall be sent. Those documents shall be generated and issued to the intervals.

Preparation of Project documents

All project documentation shall be prepared and identified in strict accordance with the instructions included in the respective appendices for each type of documents to assure compliance with completeness, accuracy, traceability and contractual requirements. Where applicable all project engineering and technical documents shall be checked and approved, attested by initialing in the spaces provided on the relevant documents.

Project Final documents

All project final documentation, including vendor data manuals, as indicated in the project specification shall be legible and of quality using suitable reprography, size reduction, irrespective of their origin and shall be complied during execution of the work in accordance with an approved index.

OUR QUALITY POLICY

GBH International Contracting LLC aspires to be the first choice in General Building Contracting and Mechanical, Electrical and Plumbing Contracting including Oil and Gas Projects by offering the best quality products and excellent services by surpassing customer's expectations, responding to customer's requirements with the highest level of services and dependability, committed to continually improve its processes and develop long-term business relationship with customers.

OUR QUALITY OBJECTIVES

Our Quality Management System will ensure consistency in all phases of our operations and the business will be conducted according to following principles:

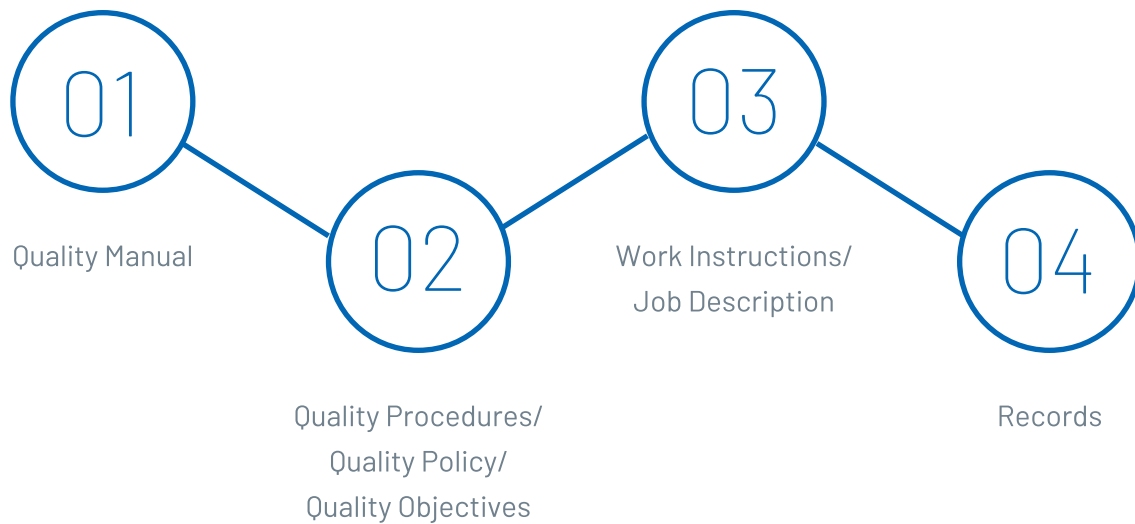

- Compete on quality by offering high standards products and services by utilizing skilled team of professionals to deliver the works at the customers' specification and satisfaction.
- Focus on modernization and improvements to produce customized products that will meet the requirements, satisfaction and cost advantages to customers.
- To continuously strive and develop the service to maintain excellence in performance in respect of all applicable best value Performance Indicators.
- Work closely with clients and suppliers to establish highest quality standards.
- Contribute to community by offering our expertise to community projects as part of corporate social responsibility.
- Provide services appropriate to the clients' needs in a timely manner.
- Possessed an innovative, proactive approach to the delivery and installation of a wide range of products and to ensure that the correct maintenance and client information is provided at the correct time in the appropriate format.
- To make all possible steps to reduce the risk of error.
- Improvising by the concept of continual improvement.
- Create environment for employees by training and empowerment to improve their efficiency.
- Create an office with friendly work environment.
- Achieve to deliver our services to the price quoted;
- To achieve a profitable return on our activities in order to fuel ongoing development and growth;
- Our Management Team will analyze customer feedback data, internal performance data, employee appraisals and peer assessment reviews including business performance data and financial performance data to ensure that our quality objectives are being met;
- Establish, develop and maintain partnerships with our stakeholders.
- Admit mistake when committed and find solution as soon as possible.

QUALITY MANAGEMENT SYSTEM PLANNING

Overall Quality Planning

The Quality Plan relates to the planned arrangements of the existing quality system that describes the activities as required under the International Standard ISO 9001. The documentation structure of the quality system is provided in four (4) tiers:

Documentation Structure

In planning or revising the quality management system, management defines processes for its operations in order to fulfill their stated quality objectives effectively and efficiently.

The result is to establish, document, implement and maintain a quality management system that complies with the requirements of ISO 9001.

When changes to quality management system are introduced, management ensures through the management review and document control processes that such changes do not affect the integrity and operation of the quality management system.
